

# WAFA– Women’s Project

## Work Assistance for Aid

WAFA –Women’s Project currently has 30 families that have been surveyed and qualified for this project. They have been knitting wool by hand at home since the start of this project, however knitting by hand has proven to be very time consuming and difficult, especially in a home setting. Zara Initiative has come up with a solution that will increase production and improve working conditions.

- Purchasing Sewing Machines that will increase production and income.
- Leasing out a warehouse that will provide a practical working atmosphere and a healthy social environment.
- A Daycare center will be set up, since most of these women have small children that hinder their work at home. The children will also be provided some basic literacy classes.

**To get this project started we are in need of funds. For only **\$7,180** we will be able to set up this small factory and create the necessary working environment for these women to provide for their families and move towards self-dependence.**

## WAFA Project Requirements Start up Costs

Description	Quantity	Unit Cost	Total Cost
Sewing Machines	30 units	\$95.00	\$2,850.00
Sewing Machine Table	30 units	\$35.00	\$1,050.00

<b>Total Costs</b>			<b>\$7,180.00</b>

# WAFA- Women's Project

## Sponsoring a Family

Join the WAFA- Women's Project and sponsor an entire family for only **\$75** a month. With your sponsorship the women of this family will be enrolled in the WAFA job training and placement program. They will receive monthly Food packs in return for their work and training. You will be provided constant updates as to how they're progressing.
